

Ignite Your Salesforce Career with the SwitchUp Program by SmartBridge

Master the art of building intelligent, AI-driven Salesforce solutions, thereby empowering customer experiences, driving automation & leading the AI Revolution from the forefront.

The Rising Demand for Salesforce Talent

Salesforce is set to create **1.8 Mn jobs** & drive **\$88.6 Bn** in revenue in India by 2028

Since 2005, Salesforce have grown massively from **13,900 to 1,50,000+** customers in 2024

Agentforce's rise is unlocking a **\$61 Billion** market, fueling demand for AI-skilled talent

India is fast emerging as the global hotspot for careers in the Salesforce Ecosystem.

Program Overview

The SwitchUp Program enables you to fast-track your Salesforce career by equipping you with industry-ready skills via expert-led training, real-world projects, globally recognized credentials & career support. **Build Skills. Get Certified. Land Your Dream Role.**

Who Should Join?

Students & Graduates

Working Professionals

Non-Tech & IT Professionals

Freelancers & Consultants

Career Changers

Salesforce AI Agent Developer

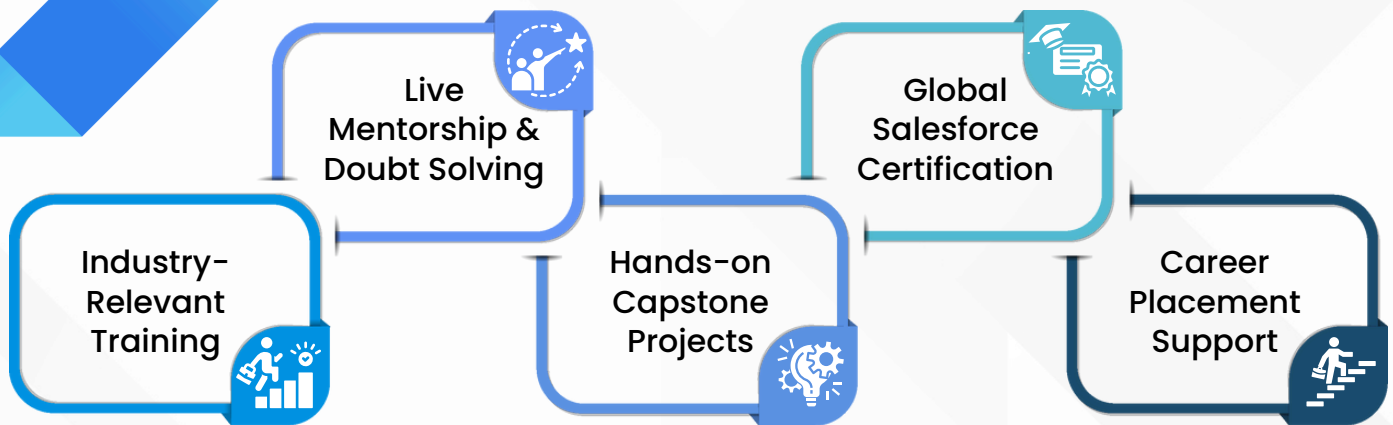

240 Hours of Immersive Learning via Hands-on Training & Self Paced Modules

Domain Training - **90 Hrs**

Project & Mentoring - **130 Hrs**

Certification Preparation - **10 Hrs**

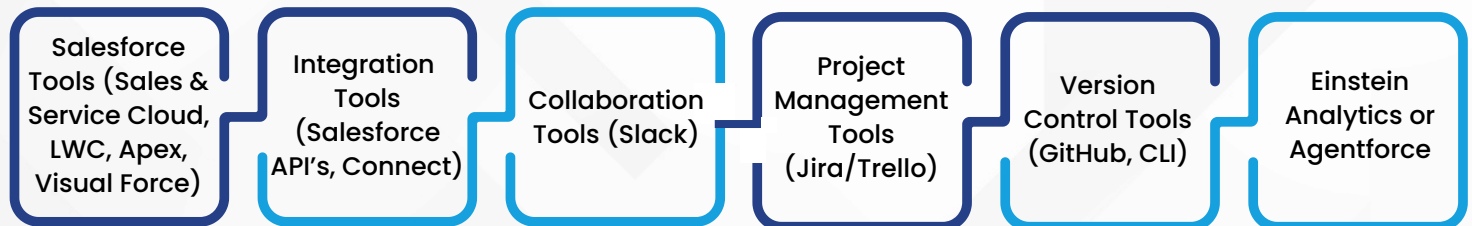

Interview Preparation - **10 Hrs**

Capstone Project – Usecases

Engage in a structured project development process that includes requirement gathering, solution design, development, testing & deployment. The capstone project ensures hands-on learning, fosters problem-solving & implementation skills essential to excel in the Salesforce ecosystem.

Gain practical expertise in:

SmartBridge & Salesforce Collaboration : Driving Excellence

As a proud Salesforce Trailblazer Workforce Partner, SmartBridge is transforming education into opportunity. We've empowered institutions, equipped educators & helped thousands of students earn globally recognized Salesforce credentials – paving the way for real career breakthroughs. Today, our learners are thriving in top organizations, turning skills into success stories.

SwitchUp Program by SmartBridge - Training Calendar for Salesforce AI Agent Developer

[Daily 2 Hours of Self-paced Learning along with 2 Hours of Virtual Instructor-Led Sessions (VILT)]

Week	Day	Session Type	Concept	Module Name	Topics Covered	Duration	Description
Week - 1	Day-1	VILT	Salesforce Platform Foundations & Core Administration	Foundations of Salesforce CRM	1. Introduction to Salesforce 2. Salesforce ecosystem 3. Key components and features 4. Salesforce editions and their differences	2 Hrs	This module lays the foundation for Salesforce Administration, covering the CRM platform, its editions, architecture, and hands-on navigation in Lightning Experience. Learners explore core administrative concepts like objects, fields, schema design, validation rules, and user management — building the skills needed for confident org customization.
	Day-2	VILT		Salesforce Lightning Navigation Essentials	1. Navigation in Salesforce Lightning Experience. 2. Customizing the user interface by managing List Views, Home Page Layout, and Apps.	2 Hrs	
	Day-3	VILT		Salesforce Objects and Field Customization	1. Understanding Standard vs. Custom Objects. 2. Creating and managing fields (Picklists, Formula Fields, Field Dependency) 3. Creating custom tabs and buttons	2 Hrs	
	Day-4	VILT		Salesforce Data Relationships and Validation	1. Lookup Relationships, Master-Detail Relationships. 2. Schema Builder: Visualizing and designing the data model. 3. Validation Rules	2 Hrs	
	Day-5	VILT		Salesforce User Management	1. User Management 2. Creating and managing user profiles	2 Hrs	
Week - 2	Day-6	VILT	User Access, Data Management & Security Fundamentals	Salesforce User Management	1. Permissions and roles 2. User licenses and types	2 Hrs	This module strengthens core skills in user management and data security within Salesforce. Learners cover roles, profiles, permission sets, and best practices for accurate data import and export. Key administrative functions like duplicate management, data consistency, field-level security, and sharing rules are explored, focusing on building a secure, structured, and scalable data environment essential for organizational integrity and efficiency.
	Day-7	VILT		Salesforce Data Management	1. Data Management 2. Data import and export techniques 3. Managing duplicate records using Duplicate Rules and Matching Rules.	2 Hrs	
	Day-8	VILT		Salesforce Data Management	1. Backing up data and best practices for data maintenance. 2. Data Archival and Mass Delete techniques. 3. Custom MetaData, Custom Labels	2 Hrs	
	Day-9	VILT		Security and Access Control	1. Security 2. User authentication methods	2 Hrs	
	Day-10	VILT		Security and Access Control	1. Field-level security 2. Sharing rules and access control	2 Hrs	

Week	Day	Session Type	Concept	Module Name	Topics Covered	Duration	Description
Week - 3	Day-11	AMA	Security Controls, Authentication & Process Automation	Ask Me Anything Session	To address your doubts & clear your queries	2 Hrs	This module focuses on strengthening security and scaling automation. It starts by implementing login controls, enforcing Multi-Factor Authentication (MFA), setting IP restrictions, and defining login hours to secure user access. Single Sign-On (SSO) is configured using SAML for seamless authentication. The module then transitions to building workflow rules and approval processes, enabling low-code automation of business logic. Together, these security and automation strategies drive organizational control, ensure compliance, and boost operational agility.
	Day-12	VILT		Salesforce Login and Access Management	1. Login Access Management: 2. Multi-Factor Authentication (MFA). 3. IP Restrictions and Login Hours.	2 Hrs	
	Day-13	VILT		Single Sign-On (SSO)	1. Single Sign-On (SSO): 2. SSO overview and implementation basics. 3. Configuring SAML-based SSO in Salesforce.	2 Hrs	
	Day-14	VILT		Salesforce Automation	1. Automation 2. Workflow rules and processes	2 Hrs	
	Day-15	VILT		Salesforce Automation	1. Approval processes 2. Creating and managing custom workflows	2 Hrs	
Week - 4	Day-16	VILT	Reports, Dashboards & Integration Basics	Salesforce Reporting and Analytics	1. Reporting and Analytics 2. Building reports and dashboards	2 Hrs	This module centers on building analytical skills and cross-system connectivity. Learners design actionable reports and interactive dashboards using advanced data visualization techniques to extract deeper insights from Salesforce data. Alongside, they explore low-code integrations with Salesforce Connect and foundational concepts for external system connections. The module also introduces Salesforce development basics, covering the development lifecycle, platform tools, and architectural foundations for scalable custom solutions.
	Day-17	VILT		Salesforce Reporting and Analytics	1. Data visualization techniques 2. Advanced reporting features	2 Hrs	
	Day-18	VILT		Salesforce Integration Essentials	1. Integration (no coding) 2. Basics of Salesforce integration	2 Hrs	
	Day-19	VILT		Salesforce Integration Essentials	1. Using Salesforce Connect 2. Integration with external systems	2 Hrs	
	Day-20	VILT		Salesforce Development	1. Introduction to Salesforce Development 2. Overview of Salesforce development tools 3. Understanding the Salesforce development lifecycle	2 Hrs	
Week - 5	Day-21	AMA	Core Apex Development & Visualforce Essentials	Ask Me Anything Session	To address your doubts & clear your queries	2 Hrs	This module introduces the fundamentals of Salesforce development through Apex programming, covering syntax, control structures, and object-oriented concepts. It also delves into data manipulation using SOQL and SOSL, debugging techniques, and trigger-based automation. Building on this, learners explore Visualforce to create custom user interfaces with standard and custom controllers. Together, these skills lay the foundation for developing scalable, custom applications on the Salesforce platform.
	Day-22	VILT		Apex Programming Fundamentals	1. Apex Programming 2. Basics of Apex language	2 Hrs	
	Day-23	VILT		Apex Programming Fundamentals	1. SOQL and SOSL 2. Writing and debugging Apex code 3. Apex triggers and classes	2 Hrs	
	Day-24	VILT		Visualforce Development	1. Visualforce Development 2. Introduction to Visualforce	2 Hrs	
	Day-25	VILT		Visualforce Development	1. Building custom Visualforce pages 2. Visualforce controllers and extensions	2 Hrs	

Week	Day	Session Type	Concept	Module Name	Topics Covered	Duration	Description
Week - 6	Day-26	VILT	Lightning Components, Flow Automation & API Integration	Lightning Development	1. Lightning Development 2. Overview of Lightning components	2 Hrs	This module advances into modern Salesforce development with Lightning Web Components, focusing on building custom interfaces through a component-based approach. It also covers advanced Flow types for implementing robust low-code automation. Learners are introduced to integration fundamentals, including REST & SOAP APIs, external system connectivity, and secure authentication with OAuth. These combined skills bridge user experience, automation, and interoperability, enabling developers to build scalable, integrated Salesforce solutions.
	Day-27	VILT		Lightning Development	1. Building custom Lightning components 2. Lightning application development	2 Hrs	
	Day-28	VILT		Mastering Salesforce Flows	1. Flows 2. Types of Flows	2 Hrs	
	Day-29	VILT		Salesforce Integration and APIs	1. Integration and APIs 2. Salesforce REST and SOAP APIs	2 Hrs	
	Day-30	VILT		Salesforce Integration and APIs	1. Building integrations with external systems 2. OAuth and authentication for integrations	2 Hrs	
Week - 7	Day-31	AMA	Testing, Deployment & Advanced Apex Techniques	Ask Me Anything Session	To address your doubts & clear your queries	2 Hrs	This module focuses on mastering test class development, exploring deployment strategies using Salesforce DX, and advancing into key development concepts. Learners dive into performance optimization, governor limits, and security best practices — essential for building scalable, efficient, and compliant Salesforce applications.
	Day-32	VILT		Salesforce Testing and Deployment	1. Testing and Deployment 2. Writing test classes in Apex	2 Hrs	
	Day-33	VILT		Salesforce Testing and Deployment	1. Deployment strategies and best practices 2. Using Salesforce DX for development	2 Hrs	
	Day-34	VILT		Advanced Salesforce Development	1. Advanced Topics 2. Security considerations for developers	2 Hrs	
	Day-35	VILT		Advanced Salesforce Development	1. Performance optimization techniques 2. Handling governor limits & bulk operations	2 Hrs	
Week - 8	Day-36	VILT	Custom Metadata & Introduction to Agentforce	Salesforce Custom Metadata and Settings	1. Custom Metadata and Settings 2. Using custom metadata types	2 Hrs	This module focuses on creating reusable configurations using Custom Metadata and Settings, followed by an in-depth exploration of Agentforce. Learners will understand its architecture, setup, and AI-powered features that transform Salesforce from a traditional CRM into an intelligent automation platform.
	Day-37	VILT		Salesforce Custom Metadata and Settings	1. Custom settings for application configuration 2. Managing custom metadata and settings	2 Hrs	
	Day-38	VILT		Introduction to Agentforce	1. Introduction to Agentforce 2. Overview of Agentforce and its role in Salesforce 3. Key features and benefits of Agentforce	2 Hrs	
	Day-39	VILT		Agentforce Basics	1. Agentforce Basics 2. Setting up Agentforce in your Salesforce org 3. Understanding Agentforce components and architecture	2 Hrs	
	Day-40	VILT		AI Agent Functionality	1. AI Agent Functionality 2. Introduction to AI agents	2 Hrs	

Week	Day	Session Type	Concept	Module Name	Topics Covered	Duration	Description
Week - 9	Day-41	AMA	AI Agents, Compliance & Agentforce Security	Ask Me Anything Session	To address your doubts & clear your queries	2 Hrs	This course deepens skills in building, managing, and securing AI Agents within Agentforce. Learners cover compliance, data privacy, and role-based access strategies, preparing them to tackle real-world implementation challenges with security and ethical responsibility.
	Day-42	VILT		AI Agent Functionality	1. Building and managing AI agents 2. Using AI agents for automation and insights	2 Hrs	
	Day-43	VILT		Agentforce Security and Compliance	1. Security and Compliance 2. Security considerations for Agentforce	2 Hrs	
	Day-44	VILT		Agentforce Security and Compliance	1. Compliance with data privacy regulations 2. Managing user access and permissions	2 Hrs	
	Day-45	VILT		Agentforce Deployment Strategies	1. Deployment Strategies 2. Plan & execute Agentforce deployments	2 Hrs	
Week - 10	Day-46	VILT	Agentforce Integration, Use Cases & Final Deployment	Agentforce Deployment Strategies	1. Using Salesforce sandboxes for testing 2. Best practices for deployment	2 Hrs	This module provides hands-on experience in integrating Agentforce with Salesforce Service Cloud and Data Cloud. Learners explore practical deployment techniques, real-world case studies, and proven support strategies, preparing them to lead successful enterprise implementations.
	Day-47	VILT		Agentforce Integration	1. Integration with Salesforce Data Cloud and Service Cloud 2. Connecting Agentforce with Salesforce Data Cloud	2 Hrs	
	Day-48	VILT		Agentforce Integration	1. Integrating with Service Cloud for seamless workflows 2. Real-time data synchronization and sharing	2 Hrs	
	Day-49	VILT		Agentforce Integration	1. Real-World Use Cases 2. Industry-specific use cases for Agentforce 3. Case studies and success stories 4. Best practices for implementing Agentforce	2 Hrs	
	Day-50	AMA		Ask Me Anything Session	To address your doubts & clear your queries	2 Hrs	
Week - 11	Day-51	Capstone Project			The project will involve setting up a Salesforce org, customizing objects, creating automation flows, building reports, and integrating Agentforce features. This hands-on experience enables participants to showcase their expertise, prepare for job roles, and demonstrate readiness for live project environments.	4 Hrs	The Capstone Project is a culmination of all the skills learned throughout the Salesforce. Learners will apply their knowledge of Salesforce Administration, Automation, Development, Integration, and Agentforce to solve a real-world business scenario.
	Day-52	Capstone Project				4 Hrs	
	Day-53	Capstone Project				4 Hrs	
	Day-54	Capstone Project				4 Hrs	
	Day-55	Capstone Project				4 Hrs	
Week - 12	Day-56	Certification Preparation			These sessions focus on revising key concepts aligned with Admin and Developer, supported by hands-on practice and strategic exam tips. Learners also prepare for real-world interviews through mock sessions, scenario-based discussions, and communication exercises, ensuring readiness for both certification exams and professional opportunities.	4 Hrs	These modules are designed to equip learners with the confidence and competence to clear the Salesforce Certification and succeed in job interviews
	Day-57	Certification Preparation				4 Hrs	
	Day-58	Certification Preparation				4 Hrs	
	Day-59	Interview Preparation				4 Hrs	
	Day-60	Interview Preparation				4 Hrs
